

About Spectrum Business

Spectrum, a brand of Charter Communications, is a major U.S. provider of internet, cable TV, mobile, and home phone services. It serves over 30 million customers across 41 states.

Spectrum is known for high-speed internet, flexible mobile plans, and a variety of TV packages including access to streaming services. The company continues to expand its offerings, especially in mobile, while maintaining a strong presence in the broadband and entertainment markets

1. Internet Services

Internet Plans

No	Download Speed	Upload Speed	Triple Play	Double Play	Standalone
1	500 Mbps	20 Mbps	\$40	\$50	\$65
2	750 Mbps	35 Mbps	\$70	\$80	\$95 (NA)
3	1 Gbps	50 Mbps	\$90	\$100	\$115 (NA)
4	2 Gbps	1 Gbps	\$140	\$150	\$165 (NA)

Note: (NA) means not available in all areas.

WiFi Options

- Basic WiFi Router: \$10/month

- Free WiFi router: Included with 1 GiGx50 and 2 GiGx1GiG plans

- WiFi Pods: \$5/month per pod

(WiFi Pods are small devices that extend your WiFi signal to eliminate dead zones and provide better coverage in larger homes or offices. They work with your Spectrum router to create a seamless, stronger connection throughout your space. Each pod costs \$5/month.)

2. TV Services

TV Packages

Package Name	Price/Month
Latino	\$25

4. Bundling Options

Bundle Types & Benefits

Single Play

Includes: Only 1 service (Internet or TV or Phone)

Best For: Users who need a single essential service

Double Play

Includes: Any 2 services (e.g., Internet + TV)

Best For: Homes needing two types of services

Triple Play

Includes: Internet + TV + Phone

Best For: Families or users seeking a complete service package with savings

Sample Customer Scenarios:

Q: I want fast Internet and live TV but no phone.

A: That's a Double Play. You could choose 750x35 Internet (\$80) and Streaming TV (\$40) = \$120/month.

Q: Can I just get WiFi with no TV or phone?

A: Yes, that would be a Single Play Internet plan. Choose 500x20 Standalone (\$165) + Basic WiFi (\$10) = \$75/month.

Q: Is WiFi included in all Internet plans?

A: No. Only the 1 GiGx50 and 2 GiGx1GiG plans include WiFi for free. Others require a \$10 WiFi rental.

Q: I only need Internet for streaming and work. Which plan should I go for?

A: A great standalone option would be the *500 megabits per second* plan at \$65 per month. If your household uses multiple devices at once, you might consider the *750 megabits* plan for \$95.

Q: Do I need to pay extra for WiFi with your Internet plans?

A: WiFi is included free with the *1 gigabit* and *2 gigabit* Internet plans. For other plans, you can rent a basic WiFi router for \$10/month or get WiFi Pods for extra coverage at \$5 each.

Q: I want a TV plan for Spanish channels. What should I choose?

A: You might like the *Latino package*, which is \$25/month. If you'd like more options, you can also add the *Latino Add-on* for just \$10/month.

Q: I'm running a small business. What TV options are available for me?

A: We offer *Business TV* and *Business Premier* at \$40 and \$70 per month, respectively. These packages are tailored for business environments and offer a great variety of channels.

Q: I need a phone line and want to forward calls when I'm away. Can you help?

A: Absolutely! You can get Remote Call Forwarding (RNF) for \$15/month. There's a one-time activation fee of \$25. It works great with any of our phone plans.

Q: Is there a bundle that gives me everything – Internet, TV, and Phone?

A: Yes, that would be our *Triple Play* bundle. For example, you could get *500 megabits Internet* (\$40), *Streaming TV* (\$40), and *Phone* (\$20), all for just \$100/month.

Q: I just want a landline. Is that possible?

A: Yes, we offer standalone Phone service for \$30/month, although it may not be available in all areas. If bundling is an option for you, you can save more with Double or Triple Play.

Q: Can I watch live sports at my bar?

A: Definitely! Our *Bar TV Sports Package* is just \$10/month and pairs well with any business TV plan. It's perfect for bars and restaurants.

Q: I already have Internet. Can I just add TV now?

A: Yes, that would be a *Double Play* plan. You can choose any TV package, like *Streaming TV* at \$40/month, and pair it with your current Internet to get bundle savings.

Q: What's your fastest Internet option?

A: Our *2 gigabit* plan offers the fastest speeds – 2 gigabits download and 1 gigabit upload – starting at \$140/month in a Triple Play bundle. It's great for high-demand households or home offices.

Q: I'm not interested.

A: I understand, but just before I let you go — we have a popular plan that includes both Internet and Phone for just \$80 a month. Most people pay over \$120 with other providers, so this could be a great way to save. Would you like to hear more about it?

Q: Your Internet speed is low, so I'm not interested.

A: I get that. What kind of internet usage do you typically have — just browsing and streaming, or something heavier like gaming or remote work?

- If it's basic: 400 megabits per second is actually more than enough, and you're getting both Internet and Phone for just \$80 a month.

- If it's heavy: We also offer higher-speed options. What speed are you currently getting? I can match you with something comparable or better

Q: Why choose Spectrum over [any competitor]?

A: Unlike many providers, Spectrum offers contract-free plans, unlimited data, and reliable fiber-optic speed—all with 24/7 support and no surprise fees.

Q: "[Contact person] is not available."

A: "Thanks for letting me know! Could I speak with someone who handles your Internet or Phone services — maybe the person who takes care of the bills?"

Q: "You don't offer services in my area."

A: "Oh, I see. When was the last time you checked with us?"

- "If recent (within the last 3 months): "Got it — then you're probably right. We might not be live in your area just yet."

- If 6+ months ago or more: "Actually, we've recently expanded and done new construction in several areas. We might have fiber Internet available at your location now.

- Let me quickly check that for you — is your current address {{address}}?"

(If not correct, prompt for the updated one and follow the address confirmation flow.)

Q: “Sounds good, but I’ll think about it — give me your number.”

A: “Absolutely! Just before I do that — is there anything in particular that’s holding you back right now? Any questions about the plans or pricing I can clear up for you?”

-If no: “Got it! I’ll share our toll-free number with you — and if I could get your email, I’ll send all the plan details there as well so you have it on hand.”

- If yes (specific concern): “That makes sense. Let me clarify that for you — and I’ll still send all the info to your email so you can look it over.”

Q: How do I reach you if I have any issues with my services?

A: Spectrum has a 24/7 customer support phone line for any issues, but the good news is you won’t need to contact them directly. I’ll be sharing my email ID, direct number, and cell number—you can message me anytime, and I’ll take care of everything for you.

Q: Where are you guys calling from?

A: We’re calling from Spectrum Business. If you’re asking about the exact location, our center is based in Dallas, TX.

Q: I don’t think we’re looking for a change right now.

A: I understand, but we’re offering high-speed fiber internet and a phone line together for just \$80/month. I’m sure your current provider is charging you more—likely over \$120/month.

Q: I’m using AT&T and you don’t have that internet speed available.

A: Got it. May I ask what your internet usage typically looks like? If it’s mostly browsing or streaming, our 400 Mbps plan is more than enough—and you’ll get both high-speed fiber internet and a phone line for just \$80/month. If your usage is heavy, let me know your current speed and I can match it with one of our higher-speed plans.

Q: We’re happy with what we have.

A: I completely understand. But we can provide both phone service and high-speed fiber internet for just \$80/month. Most customers are currently paying over \$120 for similar services—this could be a great way to save.

Q: Can you send me something in writing?

A: Absolutely. Do you have any questions I can answer for you now?

(If still no:) No problem—please share your email ID. I'll send the details right away and follow up with a call in 30–40 minutes. Would that work? Or should I call back after 2 hours?

Q: Sounds good, but I'm busy right now—can you call me back?

A: Sure, I'll call back later. Would an hour or two from now work?

(If they say not today:) That's fine—would tomorrow at the same time work for you?

Q: For how long is this rate valid?

A: The rate stays the same as long as you don't add or remove services from your account. These are standard rates, so you won't see sudden fluctuations.

Q: I'm already with Spectrum.

A: Great! How are the services working for you? Do you currently have both phone and internet with us?

(If yes:) Do you also have TV and mobile through Spectrum?

(If they have everything:) That's excellent—do you know anyone else or have another location where we can help? If not, I won't take more of your time.

Q: What about my TV?

A: Do you use TV at your business? How many TVs do you have—mostly for local news and sports? We offer TV as a bundled service for just \$30/month. If you add that to the \$80 phone and internet plan, your total would be just \$110/month.

Q: What about my current provider?

A: No worries—you won't have to do anything. We'll coordinate directly with your current provider to make the switch seamless. Starting next month, you'll receive just one bill from Spectrum for \$80/month.

Q: Is the WiFi strong enough throughout my building?

A: Yes, we provide a basic router for \$10/month. For larger spaces or buildings with coverage issues, we offer WiFi Pods at \$5/month per pod—these help extend strong, reliable signal to every corner.
